

IFQM Employee Ideation Tool

User Manual — Organisation Admin

1. Signing In

Go to your organisation's IFQM web address and sign in with your Username, Email, or Phone, plus your password, then click **Sign In**.

If your account was just created for you, you'll be asked to set a permanent password the first time you sign in — enter the temporary one you were given, then choose and confirm a new one.

Forgot your password? Use the **Forgot your password?** link on the Sign In screen — it emails you a reset link valid for one hour.

Note: There is no "change password" option anywhere else in the app once you're past your first sign-in. If you forget your password later, the Sign In screen's reset link is the only way back in.

2. Finding Your Way Around

The sidebar and top bar work the same as they do for every employee (Dashboard, notifications, dark mode, language, logout). As an admin, you additionally see:

- An **Admin Panel** section in the sidebar — this is your main workspace, covered below.
- A **Billing** page for your organisation's own subscription.

3. Dashboard

Your landing page after signing in. It shows your organisation's overall idea pipeline: totals, how many are under review, approved, and implemented, plus a status chart and a recent activity feed. This page is for viewing only — nothing to configure here.

4. Managing Employees

Go to **Admin Panel** → **User List**.

To add one employee:

1. Click **+ Add User**.
2. Fill in Full Name, Employee ID, Phone (required — used to send codes), and either a Username or Email (at least one is needed to sign in).
3. Enter their Date of Birth — this is used to generate their first-time password automatically.
4. Choose their Role, Manager, Department, Business Unit, and Location.
5. Click **Save User**.

You'll see a message showing the employee's **temporary password** — you need to tell them this yourself (in person, by phone, or however your organisation shares this kind of information — avoid sending it in an unprotected email). The formula is always: first 4 letters of their name + their birth year.

You cannot create another Admin account yourself — only IFQM's built-in super-admin account can promote someone to Admin.

To add many employees at once:

1. Click **Y Bulk Import**.
2. Click **Download Excel template**, fill it in (one row per employee), and save it.
3. Upload the filled sheet. The system checks it first without creating anything yet, and shows you how many rows will be created vs. skipped (with reasons for anything skipped).
4. Click **Create {n} employees** to finish. This runs in the background — you can close the window and it will keep going. Existing employees are never changed by an import, only new ones are added.

To edit or remove someone: find them in the User List and click **Edit** or **Remove**. If they've never submitted an idea, removing deletes their account outright; if they have, they're deactivated instead so their history is kept.

5. Setting Up the Approval Workflow

Go to **Admin Panel** → **Hierarchy**. This controls the order an idea moves through before it's approved or rejected, for your whole organisation.

- The first step, **Originator**, is fixed and can't be removed — it represents whoever submitted the idea.
- Use **+ Add a stage** to add an approval step (Immediate Manager, Team Lead, Project Lead, Department Manager, Senior Manager, Plant Head, Executive), and the up/down arrows to reorder them.
- The last stage in your list makes the final decision.
- Click **Save Workflow** when you're happy with it, or **Reset to Platform Defaults** to go back to the standard chain.

If you see a stage name that looks like `stage.team_lead` instead of a proper title — that's a known display issue, not something wrong with your setup. The workflow itself still works correctly; only the label looks odd.

The same screen also has:

- **Who reports to whom** — a quick lookup: type a name to see their full manager chain.
 - **Reporting Structure** — your organisation's chart. Click a person's manager name to reassign them to someone else; it saves immediately. The system won't let you create a reporting loop.
-

6. Idea Categories

Go to **Admin Panel** → **Categories**. Type a name and click **+ Add Category** to create a new one; click **Remove** next to any category to delete it (you must always keep at least one). Removing a category doesn't affect ideas that already used it.

7. Organisation Settings & Branding

Go to **Admin Panel** → **System**. This is where you control organisation-wide behaviour:

- **Review SLA Days / Escalation Days** — how long a reviewer has before an idea is flagged as overdue.
- **Who can read the full solution / AI assessment** — control how much of an idea's content is visible to colleagues outside the review chain.
- **What colleagues can read on someone else's idea** — tick which sections (Problem, Solution, Benefits, Attachments, etc.) are visible more broadly.
- **Largest attachment size and Problem preview length**.
- **Protect ideas on screen and Discourage copying of idea text** — both on by default; these deter casual screenshotting/copying (they cannot stop someone taking a photo of their screen).
- **Feature Flags** — turn Anonymous Submissions, the Public Idea Board, Challenges, or Email Notifications on or off for your organisation.

Click **Save Settings** when done.

Separately on the same tab:

- **Organization Branding** — set your organisation's display name and upload a logo (PNG only, up to 1MB). This is what your employees see across the app in place of the default IFQM branding.
- **🔄 Rescore All Ideas** — re-runs the AI quality scoring across every idea in your organisation, useful after changing scoring-related settings.

8. Reviewing Ideas — What You Can and Can't Do

Important: as an organisation admin, you are not allowed to approve, reject, or decide on ideas yourself. This is by design, to keep review decisions independent of administration. You'll see a banner reminding you of this on the Review Queue screen.

- Go to **Review Queue** to **look at** what's pending — use the **View** button only.
- Do **not** click **Route to Committee**, **Review**, or any decision button on this screen, even if you see them. The interface doesn't fully hide these for admins, but using them is not supported.
- Go to **All Ideas** to browse, search, and export every idea in your organisation (**Export CSV** or **Export PDF**), or to archive old ideas in bulk (**Bulk Archive**).
- Go to **Admin Panel** → **Approved Ideas** to send approved ideas to IFQM's external quality system (QCMS), if your organisation uses one. Click **Push all to QCMS**, or push individual ideas with the **Push** button per row. Set up the connection first under **Admin Panel** → **API & Integration** (enable it, paste your QCMS API key, and click **Save**).

9. Analytics

Go to **Analytics** to see your organisation's overall performance: total ideas, approval and implementation rates, average AI score, submission trends over the last 12 months, and category/impact breakdowns. This page is for viewing only.

10. Billing

Go to **Billing** to see your organisation's current plan, amount due, and next due date. If online payment is enabled for your organisation, choose how many periods to pay for and click **Pay {amount}** — this opens a secure payment window. Your payment history is listed further down the page.

11. Your Profile

Click **My Profile** to view and edit your own Department, Business Unit, and Location, and to change your registered phone number (click **Change**, verify the new number with a code, then confirm). Your Email, Reporting To, and Role are fixed and shown for reference only.

12. Getting Help

Go to **Help** for frequently asked questions, or **Support** to raise a ticket directly with the IFQM team — as an admin, you'll see every ticket raised across your organisation, not just your own.

13. Signing Out

Click **Logout** in the top bar, from anywhere in the app.

Quick Reference

I want to...	Go to
Add a new employee	Admin Panel → User List → + Add User
Add many employees at once	Admin Panel → User List → Y Bulk Import
Change the approval steps	Admin Panel → Hierarchy
Reassign someone's manager	Admin Panel → Hierarchy → Reporting Structure
Add/remove an idea category	Admin Panel → Categories
Change who can see idea details	Admin Panel → System
Set our logo/name	Admin Panel → System → Organization Branding
Send approved ideas to QCMS	Admin Panel → Approved Ideas
See how the organisation is performing	Analytics

I want to...	Go to
Pay our subscription	Billing
Change my forgotten password	Sign Out → Forgot your password?

A Few Things to Remember

- You **cannot** approve or reject ideas — that's kept separate from administration on purpose.
- You **cannot** promote anyone directly to Admin — only IFQM can do that.
- A stage name showing as text like stage.plant_head is a known cosmetic issue, not a mistake on your end.
- There's no "change password" screen after your first login — use the Sign In page's reset link if you ever forget it.
